BACHMANN FACILITY SOLUTIONS

Plug into a world of opportunities

With BACHMANN FACILITY SOLUTIONS,  
you can be sure of having access to  
the best connectors and connections  
wherever you are in the world. Our  
systems are configurable with all standard  
international socket outlets and data  
connections. Modules can be retrofitted  
or interchanged quickly and easily. In  
short, when it comes to energy and data  
management systems that are fit for the  
future, BACHMANN maximizes your options.  
There are however two areas in which  
we offer no flexibility: our high-quality  
design and our consistent quality.

# CONFERENCE

## Setting a design standard

Integrated into the top of the furniture // Simply press with your finger to open // Flap can be closed with cables plugged in // Suitable for veneer finishing

# TOP FRAME

## Perfect elegance

Access to power supply and data from any side // Silent opening // Integrated into the top of the furniture // Can be installed flush with the top of the furniture // Version with surround frame suitable for subsequent assembly

# VENID

## Exceptional design and high functionality

Harmonious surface thanks to visually smooth integration // Can be operated from either side for ease of use // Practical benefit of optional cable storage // Flexible equipment options for PDU

# CONI

## Integrated functionality

Integrated into the top of the furniture // Minimal mounting depth, robust frame design // Integrated brush insert for closing once cables have been plugged in // Power strip can be interchanged quickly // Suitable for subsequent assembly

# CONI DUO

## Twin pack

Access from two opposite sides // Just one cut-out needed // Integrated into the top of the furniture // Minimal mounting depth, robust frame design // Integrated brush insert for closing once cables have been plugged in

# CONI COVER

## Easy access

Compatible with all makes of duct and furniture // Ideal for retrofitting // Integrated brush insert for closing even when cables are connected

# POWER FRAME COVER

## Finally power found elegance

Récompensé par le  
musée d'Architecture et  
de Design Athenaeum de  
Chicago

High-quality design piece for work and living spaces // Accessible from various sides // Protection against dirt and dust // Versatile: can be combined with sockets and data, audio and video modules // Rapid installation of complete power strips

# POWER FRAME

## Compact and efficient

Compact dimensions // Suitable for subsequent assembly // Timeless design // Versatile in application // Rapid installation of complete power strips

# KAPSA

## Design-orientated and space-saving

Easily interchangeable lid available in various versions // Modular equipment options // Aluminium lid with high-quality feel // Low mounting depth (approx. 45 mm) // Simple mounting from above, retrofitting possible too

# DUE

## Create real highlights

**DESIGN PLUS**  
powered by: **light+building**

Focus Open 2016  
Special Mention

Interchangeable covers available in black, white and stainless steel look // Low mounting depth (approx. 45 mm) // Space-saving even when open // Supplied with installation template // Integrated water run-off

# PIX

## Design requirements exactly where you need it

Can be integrated on its own or in your chosen combination // Interchangeable, coloured decorative rings // Small mounting diameter of 56mm // With swivel-mounted lid as an option // Simple mounting from above, retrofitting possible too

# TWIST

## What goes around comes around

reddot design award  
winner 2012

Focus Open 2014  
Silver

Récompensé par le  
musée d'Architecture et  
de Design Athenaeum de  
Chicago

Just 40mm mounting depth // Quick and easy to install // Suitable for subsequent assembly // KEMA-KEUR approved // Space-saving cable guide

# ELEVATOR

Powered straight away

Press down with your finger to raise // Quick and easy to install // Suitable for subsequent assembly // Suitable for standard 79mm hole

# LIFT

## High-tech in motion

Simply touch to raise automatically // Attractive looks all round // Access points on four sides // Incredibly compact dimensions //  
Low mounting depth // 4 plug-in units on one height unit

# DESK 2

## Design meets technology

reddot design award  
winner 2011

Design solution for the modern living and work environment // User-focused 35° orientation // Covered cable routing to the edge // Custom versions for future-proofing

# DESK 1

Versatility with style

Flexibility of use regardless of location // With Wieland connector system or fixed cable connections // Fixed or free-standing // Custom versions adapt to future requirements

# STEP

## Fit for the future – step by step

# Custom Modules

## For custom configuration

Individual equipment options // Interchangeable modules ensure future-proofing // Simple and flexible installation

# LanLight®

## Modular installation for flexible supply to office workstations

reddot design award  
winner 2011

Delivers exactly what is needed to each workstation // Provides power, data and media connections and lighting // Modular and multifunctional – from cable connections to floor box and mobile power columns (with or without light fittings) // Attractive, harmonious visual design // No tangle of cables under the desk

# HDBaseT

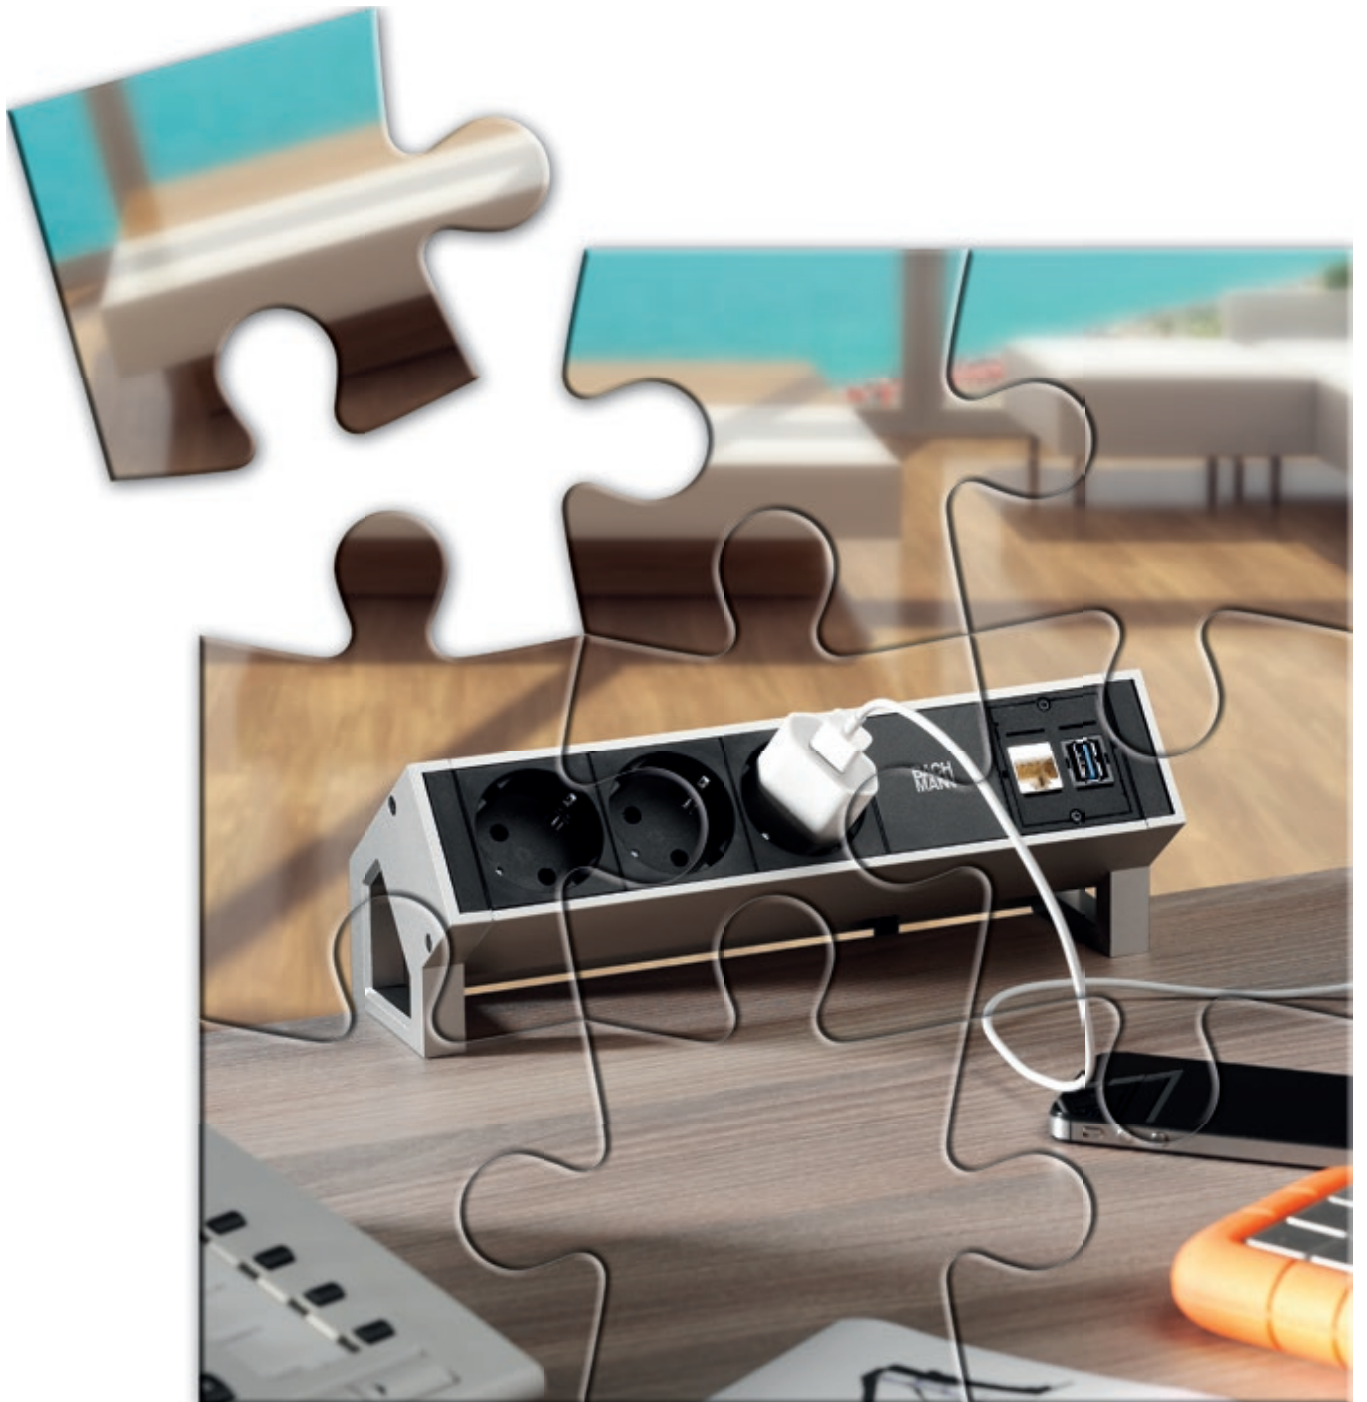

## Plug-and-play solution for meeting points

Zero-loss transmission of image and sound signals via CAT cable up to 70 metres // Simple cabling // Plug & play // No programming needed // Resolution up to UHD (4K) possible // Compatible with HDBaseT-capable displays and projectors
