EXPERIENCE HOME ENTERTAINMENT

2023

EXPERIENCE PREMIUM ENTERTAINMENT

Clicktronic stands for premium cables, making sure you enjoy premium moments to the max. Whether for music or film lovers, gamers or business people - our products let you explore a unique world of sound and images. Whether the multifaceted nuances of nature or the unmistakable sound of your favourite band: Clicktronic transmits every detail without compromise. Pure copper conductors, gold-plated contacts and multi-shielded parts drown out the background noise of everyday life. A 10-year guarantee on each product underscores our high standards.

THE PRODUCT RANGE

Discover our products, ranging from HDMI™, DisplayPort and USB to audio cables for perfect signal transmission, brilliant sound and razor-sharp images in Full HD to Ultra HD with 8K.

HDMI™

High Definition Multimedia Interface™, or HDMI™ for short, combines top picture and sound quality in one cable and is one of the most common connections for digital audio and video transmission.

DISPLAYPORT

This connector type is a universal standard for the transmission of digital image and sound signals and is used to connect computer monitors to PCs and notebooks.

DVI

The Digital Video Interface, or DVI for short, is an interface for the digital and analogue transmission of video data.

VGA

The VGA connector, also known as Video Graphics Array, is still a widely used analogue connection type for PCs, monitors or projectors.

AUDIO

The cable transmits audio signals to various receivers such as speakers, amplifiers or hi-fi systems.

ANTENNA

An antenna cable, also called a coaxial cable, is used to transmit signals from an antenna to a receiving device such as a TV, radio or amplifier.

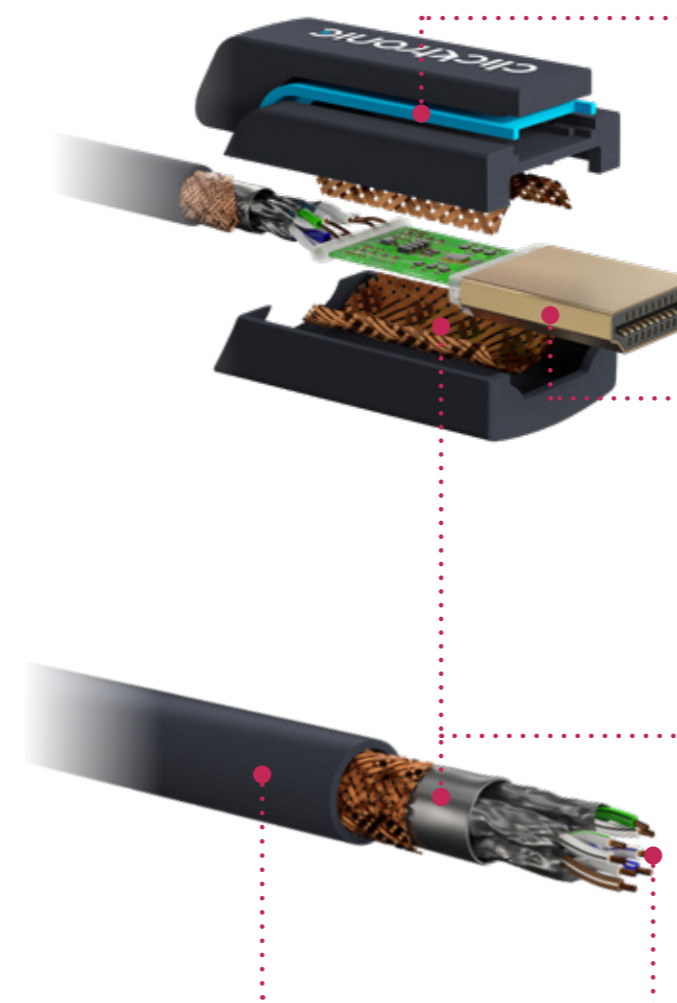

USB

With a USB (Universal Serial Bus) connection, you can exchange data between computers and other devices such as smartphones, digital cameras or external hard drives.

BRILLIANT IMAGES AND PERFECT SOUND GUARANTEED

We bank on innovative technology and high-quality materials. Our connection cables are made to last and support you in all life situations. They reliably do their job in the background while you enjoy first-rate home entertainment.

Premium cables that you can simply rely on.

STRONG AND STURDY

ABS and PVC material protect the inner conductors against jerks on the cable and provide a pleasant feel.

SUPERIOR EXPERIENCE

24-carat gold-plating prevents oxidation and ensures uninterrupted signal transmission through excellent conductivity.

INTERRUPTION-FREE

Shielding effectively prevents image flickering caused by live conductors and devices in the vicinity.

HIGH FLEXIBILITY

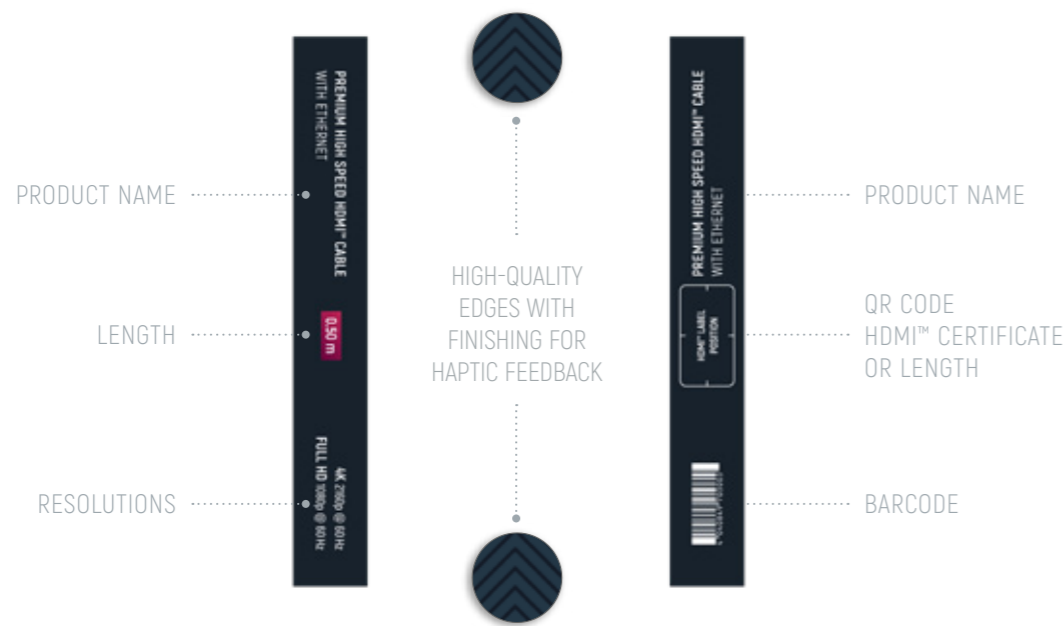

PVC does not absorb moisture even in high humidity, therefore providing long-term cable pliability.

EXCELLENT SIGNAL TRANSMISSION

Inner conductors made of 99.9 % oxygen-free copper provide an outstanding picture and sound quality thanks to improved conductivity.

PACKAGING CONCEPT

A sophisticated design is essential when creating premium packaging. Yet it is equally important to keep technical information simple and easy to grasp. By combining these two ideas we have created a complex packaging concept that supports you in identifying the right product.

reddot winner 2022

RED DOT AWARD AWARD-WINNING DESIGN CONCEPT

The extraordinary Clicktronic packaging concept convinced the international jury of experts of the renowned Red Dot Award in the category Product Design 2022. Among almost 20,000 entries from all over the world, we managed to take home the prize. It's quality you can see and feel! In-house design 100 % made in Germany.

HDMI™ CABLES

Our HDMI™ cables provide top-quality picture and sound transmission. Enjoy great home entertainment and rely on a professional performance in corporate applications. The refined composition of high-quality materials guarantees a unique experience.

HIGH SPEED HDMI™ CABLE

- The Clicktronic 4K cable with official HDMI™ Premium certification provides top quality
- UHD signal transmission with up to 4K @ 60 Hz (2160p)
- HDMI™ connection cable with a max. transfer rate of up to 18 Gbit/s

TOSLINK CABLE

- Combined with modern audio components such as home cinema systems, the optical cable creates an extraordinary sound experience
- For easily connecting devices with a TOSLINK interface such as games consoles, hi-fi systems, home cinema systems, Blu-ray players, audio amplifiers, PCs or TVs
- TOSLINK cables transmit digital audio formats such as Dolby Atmos and are resistant to electrical interference thanks to fibre-optic transmission technology
