The Ultimate Charger Series

ROCKSTAR

Mini format. Maximum power.

The Goobay Nano charger surpasses all your expectations in a charger. A real rockstar that makes all other chargers redundant.

Charge all your devices such as smartphone, tablet, notebook, earphones or e-book reader super fast. With its extra-small format, the charger makes travelling so much easier.

3-in-1

ROCKSTAR

More watts, more wow

Charge reliably and fast with a whopping 65 W. Perfect for high-performance laptops.

Charge. Everything. Fast.

Multiple ports offer freedom and security. With two 65 W USB-C™ ports and one 30 W USB-A port, charging becomes super easy.

Charge at ultra speed

3, 2, 1 - charged! Who has time to waste? The PD and QC high-speed charging modes of our chargers keep pace.

ROCKSTAR

Fits into every pocket

An indispensable travel companion in a nano-sized design. Always at hand, always ready for action.

One charger for all devices

Charge your smartphone, tablet and laptop simultaneously. Three ports - all fast, all efficient.

GaN technology

Smaller, lighter, faster - the future of charging.

Essential Chargers 5-30W

Easy charging. Easy-going.

The Essential Chargers do the job they were designed for.

They charge - always, as needed, and wherever there is a mains socket. With them, everything works like a charm. No risk. Just charge.

Multi Fast Chargers **28 – 100 W**

Many devices. Many ports. Much faster.

One charger, one solution. Equipped with up to 4 ports that drip with power.

With Power Delivery and Quick Charge, the chargers simultaneously charge your smartphone, laptop, power bank and e-reader. All at once and with intelligent distribution to perfectly supply all devices. Why settle for less?

The future with GaN

Freedom travels light. Thanks to GaN technology, the nano chargers are full of power, yet extremely light and compact. Perfect if you travel a lot!

What is the secret of GaN?

Using gallium nitride (GaN for short) as a semiconductor allows for a more compact construction. This makes more power available in a more condensed space.

The result? An ultra-small charger that supplies not just your smartphone or tablet with power - safely and quickly in no time at all.

Staying cool, staying powerful

Thanks to the more efficient energy transfer, less heat is generated during charging.

This means the charger offers full capacity over an extended period of time. Just plug it in and charge - without overheating.

Intelligent charging monitoring

Both Power Delivery (PD) and Quick Charge (QC) use active data exchange, conducting actual communication between the charger and the connected device. This data exchange permits recognising and monitoring the charging process. The devices recognise each other before initiating the charging process with the ideal charging power.

Intelligent fast charging

In the initial stages of the charging process, the technology provides high-speed charging from 0 to 80% in the shortest possible time. The subsequent interval from 80% to 100% proceeds at a slower speed to protect the battery.

Safety

Due to active control and device communication, the risk of overheating, overcharging or short circuiting is minimised, increasing unit and battery safety.

Extended battery life

A controlled and optimised charging process can extend battery life by reducing the risk of damaging overcharges or deep discharges.

Essential Charger
